To:

Dear

The King Neighborhood Association hereby expresses its opposition to the proposal to add fluoridation chemicals to Portland's drinking water.

We believe that the proposal to send fluoridation chemicals through our drinking water into every home in Portland would present potential health risks, and that limited resources could be better used on alternatives to fluoridation, such as increasing access to dental care and improving preventative education.

Sincerely,

Irek Wielgosz, King NA Co-chair

King Neighborhood Association
King Neighborhood Facility, 4815 NE 7th Avenue
